SUBJECT: Announcement of the November 2015 Software Release

The Centers for Medicare and Medicaid Services (CMS) continues to implement software improvements to the enrollment and payment systems that support Medicare Advantage and Prescription Drug (MAPD) programs. This letter provides detailed information regarding the planned release of systems changes scheduled for November 2015. This release focuses on improving the efficiency of CMS systems as well as Plan processing.

The November 2015 Release changes are as follows and may require Plan action:

- 1. Plan Benefit Package (PBP) Number for Batch Disenrollment and Batch Cancel Disenrollments
- 2. Payer Order Change for AIDS Drug Assistance Programs (ADAPs)
- 3. <u>Medicare Advantage Organization (MAO) 004 Report Encounter Data Diagnoses Eligible for Risk Adjustment</u>
- 4. Part C and Part D Risk Adjustment Model Output Data File Maintenance for 2016

1. Plan Benefit Package (PBP) Number for Batch Disenrollment and Batch Cancel Disenrollments

Currently, when a Plan submits a batch disenrollment transaction or a cancel disenrollment transaction, MARx ignores the Plan Benefit Package (PBP) and will disenroll the beneficiary at the contract level. They are disenrolled not just from the contract and PBP in which they are enrolled as of the disenrollment date, but also from enrollment in any subsequent PBPs of the same contract. When this happens, any contiguous enrollments in other PBPs within the same contract that are effective after the disenrollment date are cancelled. The Plan then needs to go to the Retro Processing Contractor (RPC) to have the enrollments re-established. This causes extra unnecessary processing for the Plan. With this change, MARx will process the disenrollment or cancel disenrollment using the PBP submitted by the Plan.

- If a Plan does want to disenroll a beneficiary retroactively from the contract, it will need to submit a disenrollment transaction (TC 51) for each PBP in which the beneficiary is/was enrolled.
- If the enrollment has a PBP and the disenrollment or cancel disenrollment transaction is submitted without a PBP, the request will reject with a transaction reply code TRC 107 (Rejected, Invalid or Missing PBP Number).
- If, on a disenrollment transaction (TC 51), the Plan submits a valid contract/PBP combination, but the beneficiary is enrolled in a different PBP for that contract, the request will reject with a TRC 050 (Disenrollment Rejected, Not Enrolled).
- If, on a disenrollment cancellation transaction (TC 81), the Plan submits a valid contract/PBP combination but the beneficiary does not have a disenrollment from that contract/PBP with the same effective date, the request will reject with a TRC 289 (Disenrollment Cancellation Rejected).
- If an enrollment is in a contract which does not have PBPs, MARx will not require a PBP on the disensollment (TC 51) or disensollment cancellation transaction (TC 81).

For example, a beneficiary is enrolled in H1234/001 effective 1/1/15 and H1234/002 effective 6/1/2016. If H1234 submits a disenrollment effective 2/1/15 for PBP 001, MARx would cancel all enrollments into H1234, including PBP 002. After the change, only the submitted PBP (001 in this case) will be affected.

2. Payer Order Change for AIDS Drug Assistance Programs (ADAPs)

In mid-December, CMS' Benefits and Recovery Coordination Center (BRCC) (formerly the Coordination of Benefits (COB) Contractor) will implement a change to correct the supplemental payer order for Ryan White AIDS Drug Assistance Programs (ADAPs). By statute, ADAPs are payers of last resort, which means that ADAP funds may not be used when payment has been made or is expected to be made by another payer. As a result, the BRCC will implement a new COB payer order moving ADAPs to last payer while retaining the existing payer order for all other payers. The complete table of Payer Order Rules is included below; the ranges affected by this change are 701 and above and are italicized. An updated payer order table will be published in the November version of the Plan Communications User Guide (PCUG).

The payer order change will be prospective. That is, once the change is implemented, the new payer order will be applied to all open records as the monthly full replacement files are received from the ADAPs by the BRCC. Since these files are not all submitted on the same day and processing times may vary, it may take a month or two for all the updates to be applied.

Payer Order Rules:

Payment Order	Payment Type	MSP Reason	Supplemental Insurance	Coverage (to Medicare)
Range		(60 1/10/10/10/10/		
001 - 100	GHP w/ Patient Relationship= 1	A, B, G		Primary

3. <u>Medicare Advantage Organization (MAO) 004 Report – Encounter Data Diagnoses</u> Eligible for Risk Adjustment

Beginning with Payment Year (PY) 2015, encounter data based diagnoses with 2014 dates of service that are valid for risk adjustment will be added as another source of data when calculating risk scores, in addition to diagnoses from the Risk Adjustment Processing System (RAPS) and from fee-for-service (FFS) claims. For PY 2016 (2015 dates of service), CMS will use a blended risk score, adding 10% of the risk score calculated using diagnoses from encounter data records and FFS claims with 90% of the risk score calculated using diagnoses submitted to RAPS and FFS claims. In order to report which diagnoses CMS has extracted from the encounter data system to use in the calculation of risk scores, CMS will send a flat file report to Plan sponsors (MAOs, PACE Organizations, entities under contract to offer cost plans, and certain demonstration projects). The report will contain the diagnoses that meet the risk adjustment rules and are, therefore, eligible for risk adjustment.

This report will be distributed to MAOs by Contract Identification Number on a monthly basis via MARx. CMS will start sending the reports in December 2015, beginning with diagnoses from 2014 dates of service.

Please see the layout for the MAO-004 report in Attachment A. If you have any questions about the report, please email RiskAdjustment@cms.hhs.gov with the subject line of "MAO-004 report, Contract XXXX.

o MAO-004 Report, Attachment A

4. Part C and Part D Risk Adjustment Model Output Data File Maintenance for 2016

In the November 2015 System release, CMS will make changes to the Part C and Part D Risk Adjustment Model Output Data File (sometimes referred to as the Model Output Report, or MOR) layouts starting with the January 2016 monthly payment. Specifically, starting with 2016 payments:

- It is no longer necessary to use Record Type A on the Part C MOR, which is used with the models introduced prior to 2014. Starting with the January 2016 monthly payment, this record will contain

blank fields>/<not be included in the Part C MOR>. Note that including Record Type A is necessary when re-running risk scores from payment years prior to 2016.
- The 2016 Part D MOR will be modified to support the new RxHCC (Prescription Hierarchical Condition Category) model, due to the HCC factors that will change with the new model.
- Please see attached layouts of the revised Part C MOR and the revised Part D MOR in *Attachment B*.

Plans are encouraged to contact the MAPD Help Desk for any issues encountered during the systems update process. Please direct any questions or concerns to the MAPD Help Desk at 1-800-927-8069 or e-mail at mapdhelp@cms.hhs.gov.

B.1 RAS MOR Rx HCC Output Data File Formats (Payment Year 2016)

The following three tables show the RAS MOR RxHCC output data file format for header, detail and trailer records used for Payment Year 2016. New Rx HCC V05 model is introduced for payment year 2016.

B.1.2 RAS MOR Rx HCC Header Record (Payment Year 2016)

The Contract Header Record signals the beginning of the detail/beneficiary records for a Medicare contract/plan.

Field #	Field Name	Data Type	Starting Position	Ending position	Field Length	Comment	Field Description
1	Record Type Code	Char(1)	1	1	1	Set to "1"	1 = Header 2 = Details 3 = Trailer
2	Contract Number	Char(5)	2	6	5	Also known as MCO plan number	Unique identification for a Managed Care Organization (MCO) enabling the MCO to provide coverage to eligible beneficiaries.
3	Run Date	Char(8)	7	14	8	Format as yyyymmdd	The run date when this file was created.
4	Payment Year and Month	Char(6)	15	20	6	Format as yyyymm	This identifies the risk adjustment payment year and month for the model run.
5	Filler	Char(14 3)	21	163	143	Spaces	Filler

The total length of this record is 163 characters.

B.1.3 RAS MOR Rx HCC Detail Record (Payment Year 2016)

Each Detail/Beneficiary Record contains information for an HCC beneficiary in a Medicare Advantage contract/plan, as of the last RAS model run for the current calendar/payment year.

Field #	Field Name	Data Type	Starting Position	Ending Position	Field Length	Comment	Field Description
1	Record Type Code	Char(1)	1	1	1	Set to "2"	1 = Header 2 = Details 3 = Trailer
2	Health Insurance Claim Account Number	Char(1 2)	2	13	12	Also known as HICAN	This is the Health Insurance Claim Account Number (known as HICAN) identifying the primary Medicare Beneficiary under the SSA or RRB programs. The HICAN, consisting of Beneficiary Claim Number (BENE_CAN_NUM) along with the Beneficiary Identification Code (BIC_CD), uniquely identifies a Medicare Beneficiary. For the RRB program, the claim account number is a 12- byte account number.
3	Beneficiary Last Name	Char(1 2)	14	25	12	First 12 bytes of the Bene Last Name	Beneficiary Last Name
