

Encounter Data Processing System General Updates

- A significant number of rejections were generated for edit **03102 – Provider Type or Specialty Not Allowed to Bill Procedure**. It was discovered that there was an issue with the provider reference table and the problem has been resolved.
- In upcoming reports, MAOs and other entities may see a decrease in the number of rejects for Edit **00065 – Missing Pick up Point Zip Code**. The system was only validating the edit on the service line level for the initial submissions. The EDS team is in the process of implementing validations on the claim level in addition to the service line level.

EDPPPS Edits That Have Been Revised or Removed

The following edits have either been removed or modified as noted since the last published version of the EDS Companion Guide (published on March 8, 2012).

EDPPPS Edit #	EDPPPS Edit Category	EDPPPS Edit Disposition	EDPPPS Edit Error Message	Revised Status
16070	Pricing	Informational	ASC Non-Approved Codes	Changed from “Reject” to “Informational” disposition.
98500	Duplicate	Reject	Multiple Claims for Surgery	Removed Edit

Testing! Testing! Testing!

Every week, the EDS bulletin will provide the results of MAO-002 reports analysis with top errors and any notable findings. For the week of 3/16 the top errors were:

Top Error Code Rejections:

1. 00065 - Missing Pick up Point Zip Code
2. 00265 - Adjustment or Void ICN Not Found in History

The EDPS Bulletin is a weekly bulletin providing the latest updates on encounter data processing to MAOs and other entities. For further system related questions, comments or concerns, please contact eds@ardx.net. Thank you for being a part of the encounter data team.
