

Encounter Data Processing System General Updates

- Edit **98325 – Claim is an Exact Duplicate of a Previously Priced Claim** rejections were occurring on the MAO-002 report for a select number of test cases. MAOs are advised to use unique encounter data for each test scenario and test certification file, unless MAOs are submitting corrections for a previously rejected encounter returned on the MAO-002 report. All encounter test cases should be unique.
- Edit **02125 – Beneficiary Date of Birth Mismatch** rejections appeared on a significant number encounter test cases. MAOs must ensure the beneficiary date of birth is correct for the selected beneficiary when submitting encounter data test cases.

Reminder

- Edit **02110 – Beneficiary Health Insurance Carrier Number (HICN) Not on File** header level rejections were occurring in error for a select number of test cases where the beneficiary HICN exists in MARx. MAOs and other entities must select a beneficiary that is currently in the plan. Additional system updates are being applied to member data tables impacting this edit.
- Edit **02240 – Beneficiary Not Enrolled in Medicare Advantage Organization for Date of Service** is under analysis for member file eligibility/enrollment information. Validation against the MBD database is in process and pending final results. Additional system updates are being applied to member data tables impacting this edit.

Testing! Testing! Testing!
