

Encounter Data User Group Known Edit Issues

June 21, 2012 User Group Session

Known Edit Issues

During the progression of the Encounter Data System (EDS) development and data collection, CMS has identified required enhancements to the edit logic for the submission of Professional and Institutional encounter data and is currently working on a software enhancement release. We encourage and welcome submitters to continue submitting data and expect the enhancements to be in place by July 16th, 2012.
