Preface

Preface

The Medicare-Medicaid Encounter Data System (MMEDS) Addendum contains information to assist Medicare Medicaid Plans (MMPs) and other entities in the submission of Medicare-Medicaid Encounter data. Information in this MMEDS addendum reflects current decisions and may be subject to change. Each version of the MMEDS addendum is identified with a version number, which is located in the version control log on the last page of the document. Users should verify that they are using the most current version.

Questions regarding the contents of the MMEDS addendum should be directed to csscoperations@palmettogba.com.

Contents

1.0 Introduction

The purpose of this addendum is to provide MMPs and other entities with unique requirements of the MMEDS to be used in conjunction with the 837P Encounter Data System Companion Guide and your State assigned Medicaid Companion Guides.

2.0 Website/Email Resources

Contact CSSC Operations at 1-877-534-2772 or www.csscoperations.com for any MMP support related questions. You may also visit our website at www.csscoperations.com.

3.0 Connectivity

MMPs may use FTP, NDM/Connect:Direct or Gentran/TIBCO/MFT for connectivity to the MMEDS. Please refer to section 3.0 of the 837P Encounter Data System Companion Guide for information regarding file size limitations and structure.

4.0 Testing Requirements

MMPs will be required to submit test files to ensure the submitter's systems are properly configured for data submission. Before exchanging production transactions, each plan must complete testing to become certified. This process allows MMPs to confirm that the CMS operational guidance has been properly programmed in their systems. A test file will need to be submitted containing 25 encounters and must pass 100% of the front end edits. In the event more than 25 encounters are submitted, the file must receive an accepted or partially accepted 999, and 277CA with a minimum of an 80% acceptance rate. Tier-II testing as outlined in the Encounter Data System Companion Guides does not apply to MMPs. (Note: MMPs must first enroll to submit MMP data before any testing occurs.)

5.0 File Submission

The Gentran/TIBCO/MFT file naming convention for files from the submitter to Palmetto should be constructed as follows:

Medicare	
Test	guid.racf.MEDS.freq.cccc.<Sub Id>.T
Production	guid.racf.MEDS.freq.cccc.<Sub Id>.P
Medicaid	
Test	guid.racf.MMCD.freq.ccccc. <Sub Id>.T
Production	guid.racf.MMCD.freq.ccccc. <Sub Id>.P

11.0 Medicaid Edits

High level file integrity checks are performed on MMP Medicaid encounters. The encounters are interrogated by a commercial off the shelf (COTS) EDI translator. CMS provides a list of edits used to process encounters submitted to the MMEDS found in the CMS 5010 Edits Spreadsheets. For a list of current edits, MMPs should refer to the spreadsheet version identifier in cell A1. The version identifier is comprised of ten characters, broken down as follows:

- Positions 1-2 indicate the line of business
  - EA – Part A
  - EB – Part B
- Positions 3-6 indicate the year (i.e., 2014)
- Position 7 indicates the release quarter month
  - 1 – January release
  - 2 – April release
  - 3 – July release
  - 4 – October release
- Positions 8-10 indicate the spreadsheet version iteration number (i.e., V01-first iteration, V03-third iteration)

The CMS 5010 Edits Spreadsheets provide documentation regarding edit rules that explain how to identify an edit and the associated logic. The CMS 5010 Edits Spreadsheets are accessible on the CMS website. In addition, a link can be found on the CSSC Operations website under Edits for Medicare Medicaid Plans. Only 999R, 999E and 277T edits are applicable and are identified in the columns labeled “TA1/999/277CA” and “Accept/Reject”.

12.0 Business Scenarios

The Submitter ID, Payer Code, and Receiver Name (EDSCMS) contained in the business scenarios in Section 9 of the 837P Encounter Data System Companion Guide will not apply to MMP Medicare or Medicaid data submissions. (**Note:** MMP submitters should use Receiver Name MMEDSCMS)
